The inclusion of trees, shrubs and other plant matter into green spaces and gardens within Colombia Urbanization Review (Directions in Development) city is of paramount importance in helping to keep the urban landscape cool, mitigating against buildings and pavements which increase heat absorption and heat storage, causing the UHI effect. Scientific discoveries and the Industrial Revolution demonstrated that man could manipulate nature through the power of technology and – over the centuries – this has led to the current global situation in which we are facing dramatic climate changes.

The Colombian Government has stepped up effort to expand its presence into  
In such areas – intermediate urbanization areas – the promotion of localization economies is the highest priority. Ferreira, F. However, high levels of access to basic services do not necessarily translate into quality services, which still lags behind international standards.
