The three alternative models emphasize different types of adjustments that employers use to adapt to increases in the minimum wage. Three variables of social determinants of depression: socio-economic status, years of school, and self-reported economic status of family, social cohesion, and negative life events were examined. In this paper, we would like to pose a simple question: What have we learned from past experiences with emerging diseases that could help us understand the emergence and spread of H1N1 influenza A and the next pandemic pathogen?

The H1N1 influenza A pandemic is the first influenza pandemic to occur in 40 years. There was significant association between social cohesion, negative life events, and depression. We obtained measures of conceptions of physics by utilizing a item questionnaire...

The problem of equitable access to vaccine for influenza strains is not a new one. Marra.
