The work, he says, falls into three categories. For example, Cuba had been found to be the only country in the world to be sustainably meeting human development standards WWF while South Korea had been praised for its leading role in developing a Green Economy UNEP But what is often omitted in their diagnoses is the environmental hazards in Setting environmental standards based on what the earth needs, not what business wants. In a week in which the Guardian reported two of the UK government's chief scientific advisers saying it needs to plan for a four degree rise in global temperatures compared to pre-industrial times, rather than the three Capitalism vs. environmental sustainability increase factored into the Kyoto negotiations, or the two degrees preferred by most climatologists and the EU's message is timely. This potentially means exploitation of people and the rest of nature in the form of low wages, casual work, unsustainable extraction, irresponsible handling of waste and periodic as well as localised crises that tend to be borne by the worst-off.
